Report on International Mountain Day
2021-22

International Mountain Day 2021: Every year, December 11 is observed as International Mountain Day to raise awareness of the significance of mountains. Mountain conservation plays a crucial role in long-term development. Nearly, 27% of the Earth's land is covered by mountains. Mountain areas cover 26.5% of the world's total continental land surface. Of the world's 237 countries, 197 include mountains. Mountains are particularly important for their biodiversity, water, clean air, research, cultural diversity, leisure, landscape and spiritual values. "International Mountain Day", was designated by the United Nations General Assembly in 2003. The General Assembly "encouraged the international community to organize events at all levels on that day to highlight the importance of sustainable mountain development."The theme of this year's International Mountain Day (IMD) on 11 December was sustainable mountain tourism.

The four-day online/offline college level seminar presentation was organized on Google Meet Platform/ Geology department lab by the Department of Geology, Shri Shivaji Science College, Amravati from 13-16 December 2021. The presentation was organized for the second and third year of B.Sc. 20 students participated in this program. The position of the examiner of the presentation is Dr. M.M. Deshmukh, Head, Department of Geology, Shri Shivaji Science College, Amravati.
