

Blood Donation Camp Session 2019-20.

August 18, 2019

Why a person requires blood has various reasons. It may be an illness or also an accident, nonetheless, it is important. The blood that we donate helps a person in need. It enhances their health condition and makes them overcome their critical situation.

In other words, blood donation does not simply help that specific person but also contributes to a responsible gesture towards society. Moreover, it also enhances the health of the donor. As the cell depletion allows a way for production, not new cells that freshen our body system. Like every year, this year also a grand blood donation camp was organized in the colleges by the Department of Physical Education and Sports. The main objective of organizing this blood donation camp was to inculcate in the students and athletes the awareness that we can make a small effort to give life to others through our blood by being useful to others while maintaining social commitment. The students are happy to realize that through blood donation we can spontaneously help many sections of the society to save their lives and get them out of many ailments.

Students learn a lot from how we can be useful to the society in the student stage and not only do they try to emulate it in their daily life but they also learn how to be social through it in the student life. With all these factors in mind, a grand blood donation camp was organized in the college in which all the constituents of the college enthusiastically registered their participation. Was held on which every unit of the college was appealed to donate blood and every unit of the college responded spontaneously.

The blood donation camp was successfully organized under the guidance of Dr. Punjabrao Memorable Medical College run by Shri Shivaji Shikshan Sanstha Amravati under the guidance of doctors who were present for the blood donation camp at a major college. Alumni of the college and alumni also participated in the blood donation camp. A total of 119 members donated blood at the blood donation camp. All those members were congratulated on behalf of the principal and on behalf of our entire department. Tea and snacks were provided for all the blood donors in the colleges.

Hon'ble Principal congratulated all the students and the organizing committee for the excellent organization. Also, all the technical members and doctors who joined the blood donation camp were thanked with a bouquet of flowers and he noted that Thus, we know that blood donation is an important procedure in saving human life. It is a great initiative that must be encouraged everywhere.
