### **About Course :**

This course is designed to give you knowledge about eco-tourism and photography and help you build a career as tour guides, Nature guides and photographers. Anyone can take a snap, but not everyone can take a good picture. A proper foundation has to be laid, basic knowledge gained and correct techniques have to be learnt.

Come & join us for this basic course for enhancing your knowledge of wild life and the art of photography. Apart from classroom sessions, there will be practical shooting sessions, field visits to National parks and sanctuaries. Who knows? There may be a famous Nature guide and photographer hiding inside you, waiting to be discovered!

### **Objectives of the course :**

- To create photography skill.
- To impart instructions on the basic concepts, evolution and scope of Eco-tourism and wildlife photography.
- To develop an appreciation for responsible and sustainable tourism.
- To awaken people to the importance of ecology, culture, history and economic development.
- To create ability for chalking out trekking programmes.
- To promote Nature and wild life photography.
- To increase awareness about conservation of Nature and wild life.
- To create a scientific attitude towards wild life.
- To arrange exhibition on wild life.
- To establish a link with national and international institutes.

### **Job prospects / Avenue :**
